

TIGRAN FRANGYAN

Senior Frontend Developer · 7+ years · Fintech & SaaS · Full-time · Remote / Hybrid

ftigran1@gmail.com · github.com/ftigran · linkedin.com/in/ftigran

SUMMARY

Senior Frontend Developer specializing in **fintech** with 7+ years of experience building complex web applications in **React** and **TypeScript**. At Rosbank (Société Générale group), I single-handedly architected and shipped a currency control platform from scratch — replacing 3 legacy systems, unifying workflows for 50+ users, and **reducing production bugs by 40%**. At T-Bank (40M+ customers), I cut CI/CD build times by 80% and led the Webpack → Vite migration. I combine deep technical expertise with product thinking: I don't just build features — I challenge requirements, propose UX improvements, and measure outcomes. I thrive in high-ownership environments where I can drive architecture, mentor engineers, and deliver measurable business impact.

EXPERIENCE

T-Bank

Senior Frontend Developer · Jan 2025 — Present

A leading digital bank in Eastern Europe with 40M+ customers.

- **Slashed CI/CD build times by 80%** (hours → minutes) by re-architecting pipeline configuration, directly unblocking 3 feature teams and accelerating release cadence.
- **Led full Webpack → Vite migration** across the frontend monorepo — HMR dropped from ~8 s to < 1 s, measurably improving developer velocity for a 12-person frontend team.
- **Shipped Sentry integration + Feature Toggles system**, enabling zero-downtime rollouts and reducing mean-time-to-detection of production errors from hours to minutes.
- **Mentored 4 junior/mid engineers** and conducted 10+ technical interviews, directly contributing to team growth and raising the hiring bar.
- **Collaborated with product & design** to refine user flows in the internal banking dashboard; proposed UX changes that reduced support tickets for a key onboarding flow.

Rosbank (Société Générale Group)

Senior Frontend Developer · Dec 2022 — Jan 2025 · 2 yrs 2 mos

A major universal bank, part of Société Générale international financial group.

- **Owned the full frontend lifecycle** — architecture, design, implementation, testing, and delivery — of a new currency control platform in React + TypeScript, operating as a de facto frontend tech lead.
- **Replaced 3 legacy systems** with a single unified platform, eliminating manual processes for 50+ currency controllers and significantly reducing operational costs.
- **Reduced production bugs by 40%** by implementing Feature-Sliced Design architecture and comprehensive test coverage (Jest, React Testing Library, Playwright) from day one.
- **Made all key technical decisions independently**: tech stack, state management (Redux Toolkit + RTK Query), folder structure, CI configuration — and documented every ADR for the team.
- **Worked closely with business stakeholders** (compliance officers, operations team) to translate regulatory requirements into intuitive UI workflows.

Kameleoon

React Developer → Core R&D; Team · Jun 2021 — Dec 2022 · 1 yr 7 mos

International SaaS platform for A/B testing and web personalization.

- **Promoted to core R&D; team** after one year for consistently high code quality, speed, and proactive problem-solving.
- Developed key components of the DevTools platform: a **Monaco Editor-based code editor**, a visual web builder, and a Chrome extension used by enterprise clients.
- **Implemented custom A/B tests for Toyota, Renault** — personalization mechanics that directly impacted conversion rates and average order value.

- Independently scoped requirements and coordinated delivery with a distributed international team under ambiguous product specs.

Atoms Digital Agency

Junior → Mid Frontend Developer · Feb 2019 — Jun 2021 · 2 yrs 5 mos

- Built **responsive, pixel-perfect** promotional sites for federal ad campaigns (React, Angular).
- Implemented interactive features: file uploads, animations, REST API integrations — growing from junior to independent contributor.

TECHNICAL SKILLS

Core	React, TypeScript, JavaScript (ES6+), Next.js
State Mgmt	Redux Toolkit, RTK Query, Effector, MobX, TanStack Query
Testing	Jest, Vitest, React Testing Library, Playwright
Architecture	Feature-Sliced Design (FSD), Micro-frontends (Module Federation, single-spa)
DevOps & DX	Vite, Webpack, Docker, CI/CD pipelines, Git, Sentry, Feature Flags
APIs	REST API, GraphQL, WebSockets, WebRTC
Styling	CSS3, Tailwind CSS, pixel-perfect layout
Familiar	Node.js, SQL, Go (basics), Vue, Angular

EDUCATION

Don State Technical University

Bachelor of Science in Computer Science · Sep 2016 — Jul 2020

LANGUAGES

English (Professional working proficiency) · Russian (Native)
